### **DETAILED ACTION**

#### Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/16/2003 has been entered.

### Claim Objections

2. Claims 1 and 7 are objected to because of the following informalities: The newly added limitation recites that "the exit side polarizer spaced apart from the exit side cover" as shown in Fig. 1. It is not clear how the polarizer can be spaced apart and stay attached to the liquid crystal display without some kind of a holding fixture or a frame. No holding fixture or a frame is either shown or described in the instant application. Appropriate correction is required.

# Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/598,268

Art Unit: 2871

4. Claims 1-4 and 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamanaka (previously cited) (U.S.Patent No. 5,835,179) in view of Kanatani et al. (Kanatani) (U.S.Patent No. 5,854,665).

As to claims 1-4 and 7-10: Although Yamanaka discloses a liquid crystal display that comprises all the limitations cited in the instant claims 1 and 7 (see the Office Action dated March 11, 2002). In addition Yamanaka discloses that the absolute value of the coefficient of the thermal expansion of the exit side cover (G2) is 6x10-7 (silica glass) which satisfies the limitation of not more than 10x10-7 /degrees Centigrade, as recited in instant claims 2 and 8. The entrance side coefficient of thermal expansion being 6x10-7, which satisfies the limitation of less than 37x10-7 (Col. 2, lines 61-63) and not more than 10x10-7/degrees Centigrade, as recited in instant claims 3-4 and 9-10.

Yamanaka however, does not disclose the newly cited limitation in the amendment dated 06/16/2003, i.e., exit side polarizer spaced apart from the exit side cover. (Note: It is not clear how the polarizers can stay spaced apart from the liquid crystal display without some kind of a holding fixture or a frame. No holding fixture or a frame is either shown or described).

Kanatani on the other hand, in disclosing a liquid crystal projector, discloses that the exit side polarizer (6) is spaced apart from the exit side of the liquid crystal display unit (8) (Fig.1), but attached to a holding fixture. The liquid crystal display unit (8) has a liquid crystal panel (2) and Kanatani does not describe the construction of the unit (8), except to say that such a construction is

Application/Control Number: 09/598,268

Art Unit: 2871

known (col. 2, lines 54-55). Hence, a conventional liquid crystal display unit will have an exit side cover as disclosed by Yamanaka.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to adapt the exit side polarizer (6) spaced apart from the exit side cover of the liquid crystal display unit for better thermal management using a cooler of the heat pipe type containing a refrigerant (col. 2, lines 10-12).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Prasad R Akkapeddi whose telephone number is 703-305-4767. The examiner can normally be reached on 7:00AM to 5:30PM M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H Kim can be reached on 703-305-3492. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9318 for regular communications and 703-872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0530.
